

Material	Brief Specification	Facilities required
NA	Two Pole DC Electromagnetic Contactor, Current Rating 400Amp, 750V DC, Breaking Current 600Amp, Control Voltage 110V DC, Suitable for Rolling Stock application, Meet IEC Standard IEC60077. These contactors are to be designed for control of all types of DC circuits. They have to withstand high level of vibration and shock as per IEC 61373 and should be suitable for applications in rail vehicles	NA
